

CAPTAIN X

Evidence-Based Practice of the Month:

Prompting

Prompting includes any help given to a learner that assists the learner in doing a specific skill or behavior. (National Clearinghouse on Autism Evidence and Practice Review Team, 2020)

Prompting Procedure

IN THE CLASSROOM / AT HOME

- Use the least intrusive prompt possible.
- Use Prompting in conjunction with other evidence-based practices such as Visual Supports
 - Avoid prompt dependency
- Determine wait time before moving to a more intrusive prompt.
 - Choose reward to motivate your child

**School and home should collaborate to find out how they are using the prompting procedure.
